#### DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

#### *Specification*

2. The abstract of the disclosure is objected to because in line 3, ``comprising'' should be - - including - - (legal or claim-type phraseology should not be used in the abstract).

Correction is required. See MPEP § 608.01(b).

3. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The specification does not provide support for ultra high molecular weight plastic (emphasis added).

5. Claims 2 and 12 are objected to because of the following informalities: Claims 2 and 12 are not supported by the

✓ Art Unit: 1732

originally-filed specification (see previous paragraph).

Appropriate correction is required.

***Allowable Subject Matter***

6. Claims 1, 3-11 and 13-20 are allowable over the prior art reference presently of record.

7. The following is a statement of reasons for the indication of allowable subject matter: The prior art reference does not disclose, suggest or teach a process of making a ski including a preload member of a resilient material and resilient structure and allowing a front portion of a ski to return to a final position P3 which has a final angle with respect to initial position P1 as set forth in independent claims 1 and 11.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leo B. Tentoni whose telephone number is (703) 308-3834. The examiner can normally be reached on Monday - Friday (6:30 A.M. - 3:00 P.M.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P. Colaianni can be reached on (703) 305-5493. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.
